

Surface Slim Pen

Sketch, write and erase naturally on screen with Surface Pen, featuring precision ink, tilt for shading,¹ and virtually no lag

CAMPARI.

“The ability to draw—precisely, might I add—directly onto the device on OneNote was something that resonated really well with the sales team. It’s a feature they are using at almost every meeting, finding it provides a real interactive dynamic to the sales process.”

Loic Herbin, IT Director, Campari Asia-Pacific

Work naturally with people-centric design

- Recommended for use with Surface Pro X
- Effortlessly express the finest sketches and lines, and rest your hand on the screen of your Surface, just as you would writing in your notebook
- Engineered for mobile professionals, creatives, information workers, and everyone in between
- Ideal for intuitive and natural note-taking
- Lets employees create and capture ideas without limits

Experience the best of Microsoft

- Use ink to edit documents (select, delete, or highlight) directly in Word
- Use the Pen as a wireless remote to control PowerPoint presentations
- Draw flow charts and diagrams in Excel, then convert them to uniform shapes
- Handwrite notes, annotate, or sketch in OneNote
- Use Edge to annotate webpages, articles, and PDF documents with natural handwriting

Be productive anywhere you work

- The ultimate tool for mobile workers in many industries
- Use in healthcare to annotate medical images
- Replace clipboards on the manufacturing floor
- Capture electronic signatures in sales scenarios
- Fieldworkers can complete forms digitally and save on costs of transcribing or filing hard documents

[1] Surface Pen tilt functionality is currently available with Surface Pro 5th Gen, Surface Pro 6, Surface Book 2 (15"), Surface Book 2 (13") (when using updated firmware), Surface Go, and Surface Studio (when using updated firmware).

“One of our veteran sales reps used to have to print proprietary customer forms, sign them with a pen, scan them, then email or fax them back to the customer. Using his Surface, he can now sign the form right on the screen and email it directly to the customer. He cuts three steps out of his process and has an electronic record of everything attached to the customer’s CRM record.”

Kent Mills, CIO, Wakefield Canada
